Dr. Lovato's 30th Year in Dentistry!

Some people question how I have tolerated "doing the same thing" for the past 30 years. My answer is simple; I haven't done the same thing two consecutive days in my career! That is why I continue to carry a passion for dentistry after three decades in the field. My profession is ever changing and advancing to improve people's quality of life. I have been fortunate enough to study and apply new technologies and procedures to give my patients the healthy and bright smiles they deserve. This is what set dentistry apart from other careers. I am able to continuously further my knowledge and understanding of oral health. I can pass this knowledge to my patients and through advanced technology, restore their teeth to superior condition. The honor of promoting health and confidence in each individual patient has been my joy over the past 30 years. I have known some of you since the day I became a dentist and that is what makes my career special. Each day is as unique as the patients I serve and for that I thank you! Thank you for 30 wonderful years in dentistry and for more to come!

-Dr. Michael Lovato

KIND- Kids In Need of Dentistry

In honor of National Children's Dental Health Month, Dr. Lovato volunteered his dental services to children in need. KIND is a local non-profit organization that Dr. Lovato has been involved with for years and he was honored to help on February 24th. This organization has been in existence since 1912 with the mission of providing dental services to children of low income families. With two locations in Denver and one here in Colorado Springs, hundreds of children can receive dental care at a cost their parents can afford, care they might not otherwise receive. Our office is very proud to support KIND. If you would like more information about KIND or how you can support their organization please visit their [website](#).

Lighthouse 360

We are excited to announce a new way in which we communicate with you, our patients. Lighthouse 360 is a new software program we recently implemented that gives us the ability to call, email, or text patients regarding your appointments. The best part is that it is 100% customizable to each patient’s needs based on your preferences. We can send a “save the date” message after an appointment is scheduled. This can easily be saved into your calendar. Short term appointment reminders can be sent anywhere from a week, to two hours prior to your scheduled appointment. Do you want to be seen sooner if there is an opening? Let us know and we can add your name to our wait list and you will receive a message when we have openings. We will send postcards as well, if that is what you prefer. Stop by or call Elizabeth to update your contact information and preferences.
